

3 - WAY SOLENOID VALVES

Miniature Size for Air, Gas, Water and
Light Hydraulic Oil

1/8", 1/4" & 3/8" BSP / NPT

FLOCON®

**SERIES
FDU - 300**

◀FLOCON▶ latest 3 Way Valve design eliminates the orifice connection in the solenoid - all connections are now in the valve body providing in - line piping. This concept with orifice and pipe connections in the body permits coil replacement without opening pipe connections - now necessary on all other 3 Way valves. These valves are commonly used to apply pressure to and vent pressure from cylinders and diaphragms or for selection and diversion of pressure. They also used for automatic control of all gases and liquids non-corrosive to brass and stainless steel.

IMPORTANT - NO MINIMUM OPERATING PRESSURE REQUIRED.

SPECIFICATIONS :

Operation :

Three Types are available :

- Normally Closed - Applies pressure when Solenoid is energised; exhausts pressure when solenoid is de-energised.
- Normally Open - Applies pressure when solenoid is de-energised; exhausts pressure when solenoid is energised.
- Universal - For Normally closed or Normally open operation.
Selection or diversion of pressure can be applied at 1, 2 & 3 without change of springs or making other adjustments.

VALVE :

- Forged Brass / Aluminium / Stainless steel body.
- Resilient or teflon seating for tight shut-off.
- Pipe connection suitable for 1/8", 1/4" & 3/8" BSP / NPT / (3/8" available with adapters)

SOLENOID :

- General purpose solenoid enclosure (NEMA 1) Weather proof solenoid inclosure (NEMA 2 & 3R)
- Continuous duty moulded coil
- Class F insulation
- All solenoid parts in contact with the fluid are made of series 300 and 400 stainless steel.

COIL VOLTAGES : Standard.

24, 48, 110, 230, 440 V AC

24, 48, 110, 230 V DC

FREQUENCY OF OPERATION :

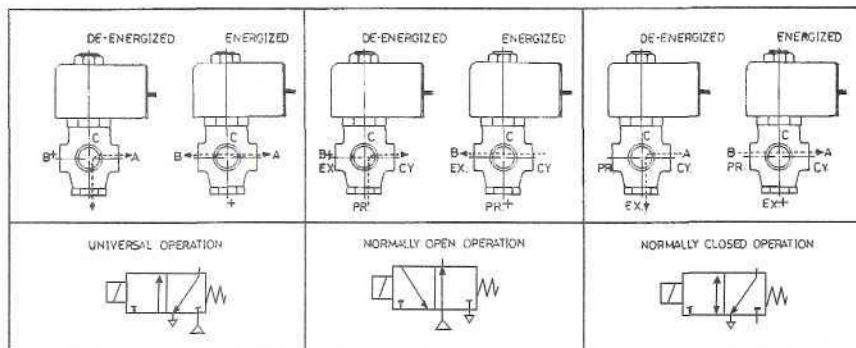

650 CYCLES PER MINUTE.

INSTALLATION :

Mountable in any position without affecting operation.

FEATURES :

- Direct operated
- Packless
- Complete tight shut off
- Compact size
- Silent in operation
- Solenoid capable of being turned 360°
- Can be mounted directly on pipe
- ◀FLOCON▶ valves are made from quality materials and are rigorously tested for leakage and performance. Each valve is subjected to twice the rated voltage plus 1,000 volts at 50C/S for seconds for insulation test
