Type	EBI 40																																					
Channel	6 bzw. 12 temperature channels																																					
Memory mode	<ul style="list-style-type: none"> · endless measurement · immediately measurement until memory full · start/stop measurement · no measurement 																																					
Sampling rate	adjustable from 0.1s – 24 h																																					
Memory	25,000 values/channel																																					
Communication	USB																																					
Measuring range	0°C ... +500°C (32°F ... 932°F)																																					
Accuracy	±0.50°C (±0.90°F), only test circuit without sensor																																					
Resolution	0.1°C (0.2°F)																																					
Sensor	thermocouple type K, SMP connections																																					
Operating temperature	0°C ... +60°C (32°F ... 140°F)																																					
Storage temperature	0°C ... +70°C (32°F ... 158°F)																																					
Power supply	battery 2 pcs. type AA, replaceable by user, power supply																																					
Dimensions	140 x 118 x 35 mm																																					
Display	TFT display 3.5", 324 x 240 Pixel, 262k colors																																					
Keys	4 keys (ESC, OK, up, down)																																					
Housing	ABS+PC																																					
Protection class	IP 30																																					

EBI 40

Applications

- Monitoring and validation of processes in steam sterilizers, hot air sterilizers, incubators, refrigerators, climate cabinets, storage rooms, transport studies, freeze-dryers etc.

- According to EN 285, ISO 17665 and ISO 15883
