FLUTEC VALVES

"FLUTEC" Manifold Block Mounting-Flow Control Valves - without Check Valve, (Model Code - DVP 8 to 40)

Description:

- Flutec Valves are designed to provide simple and accurate control of hydraulic fluids.
- By increasing number of turning of the control knob, starting from the closed position the flow increases evenly.
- The last turning results in a complete opening of the flow passage.
- The coloured scale and coloured ring in the top of the control knob permits an accurate repetition of settings and visual indication of the flow area.
- Increase in the size of the coloured triangle on the rings corresponds to an increase in flow area.
- A setscrew is provided in the side of the knob to lock the flow control valve in set position to comply with safety standards.
