

Coloured doors highlight corporate design

Colours are increasingly being used to fly the company flag. In this regard, coloured industrial doors are an ideal vehicle.

All industrial sectional doors from Hörmann are available in 14 preferred colours, as well as approximately 200 colours based on RAL and NCS*.

The wet coating on the interior and exterior sides and coil coating procedure for double-skinned, 42-mm sections in preferred colours ensure high-quality, long-lasting colour. This maintains the attractive appearance of your door.

Dark colours should not be used for double-skinned steel doors and for doors with thermal breaks that are exposed to the sun, as possible section deflection may restrict the door's function (bi-metal effect).

The galvanized subframe and fittings are not factory-coated. Anodised profiles for the wicket door and glazing beads can be optionally coated. The frames for section windows and compound windows are black as standard. Door leaf reinforcements and end caps are Grey white (similar to RAL 9002) as standard.

* With the exception of pearl-effect and fluorescent colours. Slight colour variations are permissible. All colours are based on RAL / NCS.

Doors with double-skinned steel sections in any of the 14 preferred colours are Grey white (similar to RAL 9002) on the inside.

14 preferred colours
No surcharge for double-skinned steel sections

	Traffic white RAL 9016
