Speed Radar Gun-M10P

Speed Radar Gun-M10P makes it easy to measure the speed of a car, a baseball, or pretty much anything that moves. This **Speed Radar Guns** use the best digital technology and DSP (Digital Signal Processing) to provide accurate real time measurement, accurate to ± 1.0 MPH/ or ± 2.0 KPH. **Speed Radar Gun-M10P** is more simplified than other **radar guns**, yet extremely effective. The **Speed Radar Gun-M10P** features easy **point and shoot** operation. This **Speed Radar Gun-M10P** displays speed in Miles per Hour (MPH) and in Kilometers per Hour (KPH). This **Speed Radar Gun-M10P** can track the speed of a ball from 100 feet, making it the ideal tool for tracking everything from race cars to pitching speed at a low price - we have the best prices on baseball radar guns on the market!

COSINE EFFECT ON TARGET VELOCITY: As with all Radar Guns, there are certain mathematical properties of Doppler Radar that affect the accuracy of your **Speed Radar Gun-M10P**. The **Speed Radar Gun-M10P** will measure the relative speed of a target as it approaches. If the target is in a direct line (collision course) with the **Speed Radar Gun-M10P** the measured speed will be exact. As the angle of incidence increases, if you move either right or left of this direct line, the **radar accuracy** will decrease. The measured speed will decrease as you move off this centerline. This phenomenon is called the Cosine Effect, because the measured speed is directly related to the cosine of the angle between the **Speed Radar Gun-M10P** and the target's direction of travel. As a quick reference to accuracy, remember to keep your target's direction of travel in a direct line with you, and not perpendicular.

Specifications for Speed Radar Gun-M10P :

Size (in. / mm):	4.3 x 8.4 x 6 / 109 x 213 x 152
Weight:	19 / 539
Baseball radar gun / SOFTBALL / TENNIS:	10-110 mph (90 feet away)/ 16-177 kph (27 meters away)
TRAN/AUTO RACING:	10-200 mph (1500+ feet away)/ 16-322 kph (457

	meters away)
--	--------------

Features of Speed Radar Gun-M10P :

- Easy to use - Bushnell point-and-shoot pistol grip
- Large, clear LCD police radar gun display
- Supports both MPH and KPH speed modes
- Displays fastest speed once trigger is released
- RF Radar with ±1 mph/ ±2 kph accuracy
- Battery Type: 2 C batteries (not included, but available for the immediate shipment with your Bushnell Velocity Speed Gun)

Package Contents:

- **Speed Radar Gun-M10P**

Speed Radar Gun-M10P Rating & Reviews

Average Rating

4.4 / 5

Easy To Set Up	4.8 / 5
Usability	4.4 / 5
Features	4.2 / 5
Value for your money	4.6 / 5
Meets expectations	4.3 / 5
