SPEED RADAR GUN

Introduction:

- for traffic speed supervision and control, by technologies of SCM , Microwave and programming and filtering, with advantages of multi-functions , and easy to carry and operate

Features:

- Both Moving and Stationary Version,
- Far distance effect, High accuracy,
- Mini-printer built inside, convenient to output the record,
- Automatic Self Test,
- Pre-enacted speed restriction,
- Over-speed Alarm,
- Lock and recall,
- Automatic calendar and clock,
- Compact Size, Light weight, Few Keys
- Optional Special Tripod

Technical Data:

Size	240mm long, 70mm wide	
Weight	1.2kg	
Transmitting frequency	35GHz	
Target speed measuring range	STA mode	20 – 180km/h
	MOV mode	20 – 220km/h
MOV Max effective distance (to middle or small vehicle)	STA mode	> 600m
	MOV parallel(: :)	> 200m
	MOV opposite(: :)	> 300m
Speed-measuring tolerance:	STA mode	< 1km/h
	MOV mode	< 2km/h
Power supply	11V – 16V	
Operation environment temp	-20℃ – 50℃
